25X1A

\*\*\* Comment: Probably Li-2s.

Comment: Porbably Yak-7s.

\*\*\*

Report confirms that the SCHOENLALD: airfield was occupied by PE-2 bombers (training regiment of the III Bur Corps) and by LI-2 transport aircraft. The fighter aircraft, reportedly stationed at the field, must be confirmed by other sources. So far, no fighter unit is assumed to be stationed in SCHOENLALDL. Fighters have possibly been temporarily transferred to the SCHOENLALDL airfield for use as trainers for the training regiment.
